PROFESSIONAL SUMMARY

Computer Science Engineering graduate with Software Developer internship experience at HashedIn by Deloitte. Built scalable backend applications with Spring Boot, designed RESTful APIs and microservices, developed AI-powered applications with LangGraph and Retrieval-Augmented Generation (RAG), and implemented Kafka-based data pipelines. Solved 2,300+ DSA problems across LeetCode, GeeksforGeeks, and Skillrack, including 500+ on LeetCode, with a 5th-place institutional rank in GeeksforGeeks competitive programming contests.

EDUCATION

St. Joseph's College of Engineering, Chennai

Nov 2022 – May 2026

Bachelor of Engineering, Computer Science and Engineering

CGPA – 8.24

TECHNICAL SKILLS

- **Languages:** Java , Python , JavaScript, SQL, C
- **Backend & Frontend:** Angular, Spring Boot, Express.js, RESTful APIs, JWT Authentication, HTML5, CSS3, SCSS, Typescript
- **AI/LLM Engineering:** LangGraph, LangChain, RAG (Hybrid Search, Reranking, Corrective RAG), ChromaDB, LangSmith, FastAPI
- **Data Engineering:** Apache Kafka, Databricks, Apache Spark, Autoloader, Unity Catalog, Delta Lake, MySQL, MongoDB, JPA/Hibernate
- **Tools, Infra & Core CS:** Git, Linux , Postman, Object-Oriented Programming (OOPs), Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, SRE Methodologies.

WORK EXPERIENCE

HashedIn by Deloitte

Apr 2026 – Jun 2026

Software Development Engineer Intern

On-Site

- Engineered RESTful backend services using Spring Boot with a layered Controller-Service-Repository architecture, applying SOLID principles and design patterns to build modular, maintainable applications.
- Containerized backend services with Docker and Docker Compose to standardize deployment across development, testing, and staging environments, and implemented Pagination, input validation to secure REST endpoints against malformed and excessive requests.
- Delivered 4 independent project milestones spanning backend, data engineering, and frontend tracks within a single internship cycle, maintaining a clean, peer-reviewed Git commit history throughout.

PROJECTS

AI Code Generator from Requirement Documents | Python, FastAPI, LangGraph, ChromaDB, Angular

2026

- Architected an end-to-end system with a Python/FastAPI backend and Angular frontend that parses natural-language requirement documents and auto-generates architecture diagrams, entity models, API specifications, and production-ready Spring Boot/FastAPI code.
- Designed a modular 4-stage LangGraph pipeline (parsing, retrieval, planning, generation) using ChromaDB-backed Retrieval-Augmented Generation (RAG) for context-aware code generation, with JWT-secured REST endpoints and single-responsibility, interface-driven service design.

Smart Fitness Challenge Platform | Angular, Springboot, MySQL, Kafka

2026

- Architected a role-based (Admin/User) gamified fitness platform with Angular + RxJS dashboards and a Springboot for backend, supporting configurable smartwatch devices/features and a 3-tier Task-Challenge hierarchy (friendly, regional, global).
- Streamed real-time activity events with Apache Kafka into a normalized 5-table MySQL schema (Users, Devices, Features, Tasks, Challenges) with role-based access control on all REST endpoints, powering live points tracking and rolling 7-day leaderboards.

ACHIEVEMENTS

- Solved **2,300+ DSA problems** (Arrays, Trees, Graphs, Dynamic Programming, Greedy) across LeetCode, GeeksforGeeks, and Skillrack.
- **LeetCode:** 500+ problems solved, Global Rank 189,353, 100-Day Consistency Streak.
- **GeeksforGeeks:** Ranked 5th institutionally in competitive programming contests.

CERTIFICATIONS

- **Wipro Talent Next:** Java Full Stack Development
- **NPTEL:** Programming Using C (Elite, Score: 76%), Software Conceptual Design (Score: 65%)
- **Infosys Springboard:** Data Structures and Algorithms Using Java
